

Pylon sign A2, proposed within the master sign program, will give identity to the property through the display of the shopping center's new name, a listing of major and prominent tenants, and through the use of quality materials and design showcased in the sign's construction.

The map at the right shows the location (at the number) and the direction (shown with arrow) of each of the views within this exhibit. The views aim to represent what the pylon sign will look like to motorists approaching the property while driving on Interstate 5 as well as drivers within the residential neighborhood opposite Five Lagunas on the east side of the freeway.

View 1 - Northbound on Interstate 5. Pylon sign visible on left.

View 2 - Southbound on Interstate 5. Pylon sign visible on right.

View 3 - Looking west from residential neighborhood towards and across freeway. Pylon sign just visible over neighborhood wall at right.
